AI Agents | LangChain & LangGraph | Machine Learning | Final-Year Student at the University of Sunderland

Greece

Σύνοψη

Final-Year Computer Science Student | Software Engineering & AI/MLI'm a final-year Computer Science student at the University of Sunderland with hands-on industry experience as a Web Developer Intern at ARTIT.During my internship, I contributed to the ARTIT platform through frontend development, feature implementation, bug fixing. I also built an agent to automate daily web research for upcoming artists and automated QA testing using Next.js and TypeScript. This experience strengthened my interest in building reliable software and understanding how real-world applications are developed, tested, and maintained. My interest in AI and LLMsI'm particularly interested in the engineering behind large language models, including Transformer architectures, tokenization, attention mechanisms, pretraining, and fine-tuning.My long-term goal is to deepen my understanding of language models by building, experimenting with, and eventually fine-tuning open-source LLMs, moving beyond API integration toward understanding how these systems work under the hood. Software engineeringI believe the future is here and I am particularly interested in integrating LLMs into robots and applications. I'm always learning, experimenting, and building with the goal of turning ideas into working softwareFind me on:#Github: https://github.com/GeorgiosMavropoulos/

Εμπειρία

Artit

Junior Developer

July 2026 - October 2026 (4 μήνες)

Athens Metropolitan Area

Contributed to the development of the ARTIT platform by participating in code reviews, bug fixing, feature implementation, testing, and frontend improvements while collaborating with senior developers.

Developed an AI agent that explores art platforms to discover relevant art opportunities, identify event organizers, and connect with artists.

Vape & E-Cigarette Retail Shop

Owner / Operator

October 2023 - October 2024 (1 έτος 1 μήνας)

Greece

- Managed operations, inventory, suppliers, and customer relations.
- Built Shopify e-commerce store.
- Handled sales strategy and business decisions.

Εκπαίδευση

University of Sunderland

Bachelor's degree, Computer Science · (October 2024 - May 2027)
